1. (Amended) A system for denoting and communicating with a <u>mobile site couplable to a fixed site of a</u> computer network [site], comprising:

an address parser that makes a determination of whether [said] <u>a</u> site is [a] <u>said</u> mobile site [from an address of said site] <u>or said fixed site</u>; [and]

<u>a mirror site couplable to said computer network, wherein said mirror site is a mirror update of said mobile site; and</u>

a communications manager that manages communication with said site based on said determination<u>, said communications manager directing said communication, when said site is a mobile site, either to said mobile site when said mobile site is available or to said mirror site when said mobile site is unavailable</u>.

Please delete Claim 2.

In Claim 3, line 1, please delete "Claim 2" and insert therefor --Claim 1--.

In Claim 3, line 2, please insert --site-- after the text "update said mirror".

Kindly rewrite Claim 8 as follows:

8. (Amended) A method of denoting and communicating with a <u>mobile site couplable to a fixed site of a</u> computer network [site], comprising:

making a determination of whether said site is [a] <u>said</u> mobile site [from an address of said] <u>or said fixed</u> site; and

managing communication with said site based on said determination, where said communications managing includes directing said communication, when said site is a mobile site, either to said mobile site when said mobile site is available or to a mirror site of said mobile site when said mobile site is unavailable, said mirror site couplable to said computer network, wherein said mirror site includes data from a mirror update of said mobile site.

Kindly delete Claim 9.

In Claim 10, line 1, please delete "Claim 9" and insert therefor --Claim 8--.

In Claim 10, line 2, please insert --site-- after the text "update said mirror".

Kindly rewrite Claim 15 as follows:

15.   (Amended) A computer network, comprising:

[a plurality of] fixed sites having fixed-site domain names associated therewith;

[a plurality of] mobile sites having mobile-site domain names associated therewith;

a communications infrastructure that couples ones of said pluralities of fixed and mobile sites for communication therebetween;

an address parser that makes a determination of whether [said] a site is [a] one of said mobile [site] sites [from an address of said site] or one of said fixed sites; [and]

a mirror site couplable to said computer network, wherein said mirror site is a mirror update of said one of said mobile sites; and
